

Please amend the abstract as follows:

Arrangement in a blower ~~comprising~~ including at least an engine and a fan, ~~said~~
~~the fan comprises~~ includes a fan housing enclosing a fan wheel and a fan inlet.
The engine and fan are surrounded by a casing provided with an air inlet to let air
in to the fan inlet placed inside the casing. The air stream from the air inlet in the
housing to the fan inlet cools the engine and components inside the casing
before it enters the fan inlet and leaves the blower via a blower tube. The fan
housing is provided with an opening (31) placed in the fan housing so that air is
allowed to leave the fan in case of blocked air stream in the fan outlet or blower
tube.
